

Personally, I have found XM Satellite Radio to be of enormous value on a number of different levels; I view the efforts of the Natrional Association of Broadcasters to interfere with satellite radio as little more than sour grapes - rather than enhance what they do, they choose instead to criticize the organization that serves its audience well. Please reject Petition 04-160 and all others like it, and allow XM Satellite Radio to do what it does best -- serve the genuine needs of the American public.

Thank you.
